

Construction Notice: Valley Line West LRT

Surveying Activities on 87 Avenue, 156 Street, Stony Plain Road, 104 Avenue, and 102 Avenue

Beginning on or around February 2, 2022, crews will be verifying local ground conditions along the entirety of the Valley Line West alignment. To do so, crews will be drilling holes to locate utilities, surveying, and taking measurements that will provide important data to guide the design and construction of the LRT infrastructure.

To accommodate this work, there may be temporary single lane traffic interruptions during off-peak hours (9 a.m. to 3 p.m.), however, construction activities may take place between 7 a.m. and 9 p.m. This work is expected to last three months.

Valley Line West Alignment Construction Pre-works

- This will be a Moving Work Zone – work will not be fixed to one location but will move from site-to-site along the alignment.
- Generally speaking, crews will be working their way eastward from the Anthony Henday Overpass to the downtown core (102 Avenue and 102 Street).
- Work will occur during off-peak hours (9 a.m. – 3 p.m.)
- There will be periodic traffic interruptions while this work occurs (15 minutes up to three hours at each location).
- There will be noise associated with this work, specifically, that of a hydrovac truck.
- This work is expected to last through to the end of May.

The information in this bulletin is current to January 26, 2022. Please note that all dates are approximate and weather-dependent. We thank you for your patience during construction of the Valley Line West LRT project.
